Barsha Heights, TECOM, Dubai

WHO WE ARE

DG Training and Development Institute

DG Training and Development Institute is a leading training institute in Dubai, UAE, offering high-quality and affordable professional courses.

We focus on practical learning that helps learners develop relevant skills and apply their knowledge in real-world situations.

Our training programs cover a wide range of fields, including Graphic Design, Microsoft Office, Video Editing, Programming, Digital Marketing, Financial Accounting, and more.

WHY CHOOSE US

- 1 Affordable Courses
- 2 Flexible Learning Modes
- 3 Beginner-Friendly Learning
- 4 Job Assistance
- 5 Experienced Instructors
- 6 KHDA-Permitted Training
- 7 Practical Training
- 8 Interactive Learning
- 9 Customized Training
- 10 Career Guidance

Understand the Modules

AT A GLANCE

LEVEL	Beginner-friendly
MODE	Online and Classroom
FREE DEMO	Free Demo Class available
ENQUIRE	+971 50 100 4958 info@dgtrainingland.ae

01 Figma Fundamentals

- Introduction to Figma
- Exploring the interface and workspace
- Understanding files, pages, and frames
- Working with design tools and properties

02 UI Design Essentials

- Layout, spacing, and alignment
- Typography and colour combinations
- Visual hierarchy and consistency
- Designing user-friendly interfaces

03 Wireframing and Responsive Design

- Understanding wireframes
- Structuring website and app screens
- Creating responsive screen layouts
- Mapping user journeys and screen flows

04 Prototyping and Collaboration

- Creating interactive prototypes
- Adding transitions and interactions
- Working with components and libraries
- Sharing designs with developers and teams

Explore the Figma Workspace

Introduction to Figma

- Understanding Figma and its applications
- Exploring the Figma interface
- Creating and managing design files
- Working with pages and frames
- Understanding design properties and settings

Essential Design Tools

- Selecting and moving objects
- Creating shapes and basic elements
- Adding and editing text
- Positioning and resizing objects
- Aligning and distributing elements
- Grouping and organizing design components

UI Design Fundamentals

- Understanding user interface design
- Applying layout and spacing principles
- Using grids and alignment
- Selecting suitable colours and fonts
- Creating clear and consistent interfaces

Images, Assets and Organisation

- Importing and positioning images
- Working with design assets
- Managing layers and object properties
- Maintaining consistency across screens

Bringing Ideas to Life Through UI/UX Design

Frames, Grids and Auto Layout

- Understanding frames and their properties
- Working with layout grids
- Applying spacing and alignment
- Managing padding, gaps, and element positioning
- Creating adaptable interface components

Components and Reusable Elements

- Understanding components and instances
- Creating reusable design elements
- Updating and maintaining components
- Creating consistent buttons, cards, and navigation elements
- Reusing elements across multiple screens

Design Systems and Libraries

- Understanding design systems
- Creating consistent colours and typography
- Organizing reusable assets
- Working with shared component libraries
- Updating designs efficiently

Responsive Interface Design

- Designing for different screen sizes
- Adapting layouts for desktop and mobile
- Using constraints and responsive properties
- Creating consistent cross-device experiences

From Wireframes to Interactive Prototypes

Wireframing and User Flows

- Understanding the purpose of wireframes
- Planning website and mobile app structures
- Arranging content and interface elements
- Mapping user journeys
- Organizing information for better usability

Interactive Prototyping

- Introduction to prototyping in Figma
- Connecting screens and interface elements
- Creating clickable interactions
- Building navigation between screens
- Previewing and testing prototypes
- Identifying and improving user flow issues

Collaboration and Developer Handoff

- Sharing design files and prototypes
- Collecting feedback from team members
- Reviewing and updating designs
- Sharing specifications and design assets
- Supporting communication between designers and developers

Practical Design Projects

- Creating a website landing page
- Designing mobile application screens
- Developing a multi-screen user flow
- Applying components and Auto Layout
- Reviewing and refining a complete interface design

Benefits of Learning Figma

1

User-Centred Design

Create interfaces that consider user needs and usability.

2

Modern Interface Design

Design clean and visually appealing websites and mobile applications.

3

Interactive Prototypes

Demonstrate how a digital product works before development.

4

Responsive Layouts

Create adaptable designs for different devices and screen sizes.

5

Design Consistency

Use reusable components and libraries to maintain a consistent interface.

6

Team Collaboration

Share designs, gather feedback, and work efficiently with others.

7

Faster Design Workflows

Use Auto Layout and reusable elements to simplify repetitive tasks.

8

Better Developer Handoff

Communicate design specifications and share assets with development teams.

9

Career Development

Build practical skills relevant to UI/UX and digital product design roles.

10

Portfolio Development

Create interface designs and prototypes to demonstrate your design capabilities.

Who Should Join

Students and freshers

exploring the world of UI/UX as a starting point

Graphic designers

looking to upskill and move into UI/UX

Web designers

looking to gain a better grasp of the latest UI/UX skills

Entrepreneurs and founders

handling digital products who need a basic understanding of UI/UX

Freelancers

looking to add more skills to their service offering

Free Demo Class available | +971 50 100 4958

Thank You!

Turn Your Ideas into Digital Experiences

Begin your UI/UX design journey with the Figma Course in Dubai at DG Training and Development Institute.

Explore interface design, create wireframes, build interactive prototypes, and develop practical skills for modern digital product design.

Learn through instructor-led sessions, hands-on exercises, and practical design activities.

Ready to design your future? Get in touch with us today!
